DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all

obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 5, 13-16, 18, and 23-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kodama et al (6,858,370).

Kodama et al disclose a positive photoresist composition comprising an acid generator meeting the instant claim limitations. Compounds of formula (II) in columns 13-16 appear to meet the instant claim limitations. The structure in column 13 (lines 1-24) has three substituents, which may all be an organic group not having an aromatic ring, preferably, 1-20 carbon alkyl groups, 2-oxoalkyl, or alkoxycarbonylmethyl group. Each of these being a preferred group would meet the instant claim limitations. Given this teaching, it would have been obvious to one of ordinary skill in the art to prepare the material of the reference choosing each of the groups to be a straight chain or branched 2-oxoalkyl group, alkoxycarbonyl, or 1-20 carbon alkyl group with reasonable expectation of achieving a material having high etch resistance.

Response to Arguments

3. Applicant's arguments filed 2/23/2006 have been fully considered but they are not persuasive. Applicant has argued that the reference fails to meet the instant claim limitations as the compounds of the reference are not entirely sigma bonded and do not contain cyclic groups.

Art Unit: 1752

As discussed above, the generic formula in column 14 clearly teaches that all three substituents may be groups other than cyclic groups, therefore the rejection will be maintained.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
